

**LABELLING**

WARNING TO STAFF

Use of the material: Quartz surfacing designed for kitchen and bathroom worktops, flooring, cladding and other architectural uses.

Composition (%): The material is made up of inorganic mineral deposits (85-95%), including, but not limited to, silica sand, quartz, cristobalite, glass and others, polyester (5-15%), pigments and additives (<5%).

There is no provision for any risk associated with the finished **NAME** material in the CLP (CE) regulation nº. 1272/2008. However, during manufacturing and installation of the material, it is necessary to consider the following information. Please read carefully.

FABRICATION AND INSTALLATION

This material should be fabricated using methods that involve the use of water to avoid the creation of dust. Dust derived of manufacturing process processes contains Crystalline Silica (SiO<sub>2</sub>).

Long term unprotected exposure to dust derived from the cutting, polishing and manufacturing processes may cause serious diseases as pneumoconiosis, silicosis as well the deterioration of lungs including diseases such as bronchitis, emphysema, etc. Fabricators should comply with all applicable governmental regulations.

For specific information on each case, please, read our Material Safety Data Sheet and Good Practice Guide to manufacture. Information available at [www.website.com](http://www.website.com)

HEALTH & SAFETY INFORMATION ABOUT CRYSTALLINE SILICA (SiO<sub>2</sub>) RESPIRABLE FRACTION.

	<p>STOT RE 1</p>	<p><b>HAZARD</b> H372: Causes damage to lungs through prolonged or repeated exposure (inhalation)</p> <p><b>PREVENTION</b> P260: Do not breathe dust generated in the cutting, grinding and polishing processes. P264: Wash face and hands thoroughly after handling. P270: Do not eat, drink or smoke when using this material. P284: Wear respiratory protection for particles (P3).</p> <p><b>FIRST AID MEASURES</b> P314: Get medical advice/attention if you feel unwell. P501: Dispose of scrap material in accordance with local regulation</p>
